John Currier is the proprietor of JP Currier Consulting LLC, a small veteran-owned company specializing in advice and counsel for management solutions concentrating on major systems acquisition projects, particularly in shipbuilding and aviation. As a Level III certified program manager and systems engineer, John has a broad experience base in program management, Federal budgeting, global operations, industrial activities and overall management of a major organization. He has a proven record as a change agent, driving results through cost constrained management and the motivation of people.

John is an experienced leader in the arena of national-scale disaster management. Previously designated as a field Principal Federal Official by the Secretary of Homeland Security, he has participated in leadership positions for several major disasters including the Deepwater Horizon mishap, the Haitian earthquake, Hurricane Sandy, the H1N1 pandemic preparations and numerous other major natural disasters.

An experienced Naval Aviator, he has flown over 6500 hours in military turbojet, rotary wing and all types of basic civil aircraft. He holds an Airline Transport Pilot (ATP) license with Commercial Land/Sea ratings. He is a trained and experienced aircraft and vehicle accident investigator.

John's initial career following graduation from the University of Southern Maine was in law enforcement as a patrol officer and criminal investigator.

With decades of experience in senior leadership positions, John's core skillsets as a Stellar Advisor include homeland security, disaster response, joint operations, command and control, continuity of government.
