Science  
Embry Riddle University

Bachelor Degree in Business  
Administration  
Texas A&M University

Marc Jamison is the Principal at Cyber Checkmate Consultants in the San Antonio/DC region. Following 24 years of U.S. Air Force service with eight years of cyber industry experience, he is known as an innovative senior executive who is well connected and understands the deep technical underpinnings of cyber plans and operations.

He served as a USAF senior officer within the US Cyber Command (a plank holder). He was involved in Strategy, planning and operations advising senior U.S. Government (USG), U.S. Strategic Command (STRATCOM), National Security Agency (NSA), Department of Homeland Security (DHS), and Defense Information Systems Agency (DISA) leadership on strategies and policy. He additionally designed and executed the largest cyber network operation to that point in time for DOD and the USG.

Marc has supported teams that won the USCYBERCOM OMNIBUS and the Task Order supporting the J3 running the JOC. He also co-led development of a \$300 million contract with the Air Force Research Lab (AFRL) for agile cyber technologies (ACT) and won.

Leadership and innovation are engrained in all his endeavors. For over two years, Marc served as the Chair of the Cyber Joint Interagency Task Force meetings, forums which included 27 agencies. He was the architect for Cyber Flag, the realistic full spectrum joint cyber warfare training event at the national range. Marc also established the inaugural Cyber Joint Operations Center at Fort Meade as the focal point for national cyber coordination and direct action.

With foundational skillsets of business development support and platform, strategic planning, operational planning, operations management, training, and assessments, Marc's expertise inside and outside the cyber arena makes him an invaluable Stellar Advisor.
